Giving Clinicians a Voice

# Problem-solving

- Over 50% of doctors time
- Staffing shortages & productivity
- 58% of doctors have symptoms of burnout
- Inefficient EHR workflows
- Expensive data entry
- Speech Recognition - it's not "one size fits all"
- Burden of IT management

# T-Pro Clinical Documentation Solution

# Clinician Experience

# Case Study: Galway Clinic

## Challenges

- Delays transferring critical medical information to EHR
- Poor quality or incomplete narrative
- No easy access for clinicians to update patient records
- Clinician engagement with EHR

## T-Pro Solution

- Co-developed a branded app - “GC Dictate”
- Patient list on mobile
- Fully paperless solution
- 1-hour turnaround
- Real time access to patient information
- 7-day a week support

**Ronan Kavanagh**

Consultant Rheumatologist, Galway Clinic

*“T-Pro’s mobile solution means I can dictate and approve documents without being tied to a desk. Ultimately I spend more time caring for patients and less on administration.”*

57%

increase in compliance

96%
